

About Dealveel

Welcome to **Dealveel**, a modern hyperlocal marketplace designed to help people discover, buy and sell with confidence.

Dealveel is an online platform that connects Buyers and Sellers by making local listings easy to discover. Whether you're looking for a residential plot, house, apartment or commercial property, Dealveel helps you find opportunities around you through a simple and user-friendly experience.

Our goal is to make local buying and selling more transparent, accessible and convenient by providing a platform where users can connect directly.

Our Mission

Our mission is to simplify local commerce by creating a trusted digital marketplace where people can easily discover nearby opportunities and connect directly with each other.

We believe that buying or selling should be simple, transparent and accessible to everyone.

Our Vision

Our vision is to build one of India's most trusted hyperlocal marketplaces.

While Dealveel currently focuses on property listings, our long-term vision is to expand into additional categories such as:

- Cars
- Bikes
- Commercial Vehicles
- Electronics
- Furniture
- Rentals
- Other local marketplace categories

Our aim is to create a single platform where people can discover everything available around them.

What We Do

Dealveel provides a technology platform where users can:

- Create an account
- Publish property listings

- Search nearby listings
- Save favourite properties
- Contact Sellers directly
- Discover opportunities within their preferred location

Our platform is designed to make local discovery faster and more convenient.

Our Role

Dealveel is an online technology marketplace.

Our role is limited to providing a platform where Buyers and Sellers can connect.

Dealveel:

- does not act as a property broker or agent;
- does not negotiate transactions;
- does not verify ownership or legal documents;
- does not inspect properties or vehicles;
- does not guarantee the accuracy or authenticity of listings;
- does not participate in payments or agreements between users.

All transactions and decisions are made directly between Buyers and Sellers.
